

Scientific Software & Systems Ltd Gets Behind Wellington Coastguard's Vision

Wellington based software company, Scientific Software & Systems Ltd (SSS), announced today that it has entered a 3 year Sponsorship Support Agreement with the Wellington Volunteer Coastguard (WVCG).

SSS invited WVCG President, Stuart Marshall, to provide a 'Wish-List' of component upgrades the Coastguard could use to replace some of its ageing computer equipment.

SSS was able to leverage its technology resources and expertise, supplying each of the items on the wish list including a range of PCs, a Networked Printer, and some IP Based Cameras.

As part of its ongoing support agreement, SSS is now working with WVCG to provide better internet connectivity, additional computer equipment and more surveillance cameras for enhanced protection at their base.

According to Mr Marshall, the relationship with SSS will greatly enhance the Coastguard's ability to meet the growing demands of the region's maritime community.

"This sponsorship arrangement will not only assist us by providing a more modern IT environment for our crew members for training purposes, but with the added benefit of enhanced internet connectivity, allow us to maintain our website and hopefully draw in further members and sponsors. The Unit will also benefit from added security at the base, and with faster access to information on the internet by our radio operators, will help us to provide quicker information updates to our 'on water' crews during searches."

The Wellington Volunteer Coastguard is to recognise Scientific Software & Systems as a sponsor by displaying its logos at their base, and on their website and publications.

Ends.

ABOUT THE WELLINGTON VOLUNTEER COASTGUARD

The Wellington Volunteer Coastguard's Missions are:

- To save life and property at sea
- To foster maritime safety and training

While the Wellington Coastguard is now a mature and effective organisation, it relies completely on the dedication of its (100% voluntary) members and the full extent of its funding to pursue these missions and realise further aspirations. As a volunteer community service, Wellington Volunteer Coastguard relies totally on discretionary funding, including community funding, corporate sponsorship, membership subscriptions and voluntary donations.
